

# **Photo Editing Computer**

*Photo editing computers are used by people who take pictures and edit them.*

*Businesses that use photo editing computers like wedding photos or photo studios need good editing computers.*

*An ideal photo editing computer should have a good CPU, a good amount of RAM and a decent graphics card.*

## BUDGET MACHINE (800\$)

If my budget was only 800\$ I would get some type of laptop the one I found that was good is the Hp ProBook 440 From BestBuy.

This Laptop has a decent processor and it has 8GBs of RAM.

## DREAM MACHINE

For My dream machine I would choose the 13-inch MacBook Pro from Apple.

This MacBook has an Intel Core i7 processor, 8GB of RAM, and a 256 GB SSD.
